

In 2019, wind turbines provided approximately

6% of global electricity.

Renewable energy projects in Telangana

Mytrah Energy Ltd has set up a 108 MW wind generation farm in Nazeerabad area in Parigi mandal of Vikarabad district in the state.

It is an energy source that **does not** create waste or cause carbon emissions, soot, smog, acid rain or global warming

Global Wind Day is a worldwide event that occurs annually on 15th June. It is a day for discovering wind energy, its power and the possibilities it holds to reshape our energy systems, decarbonize our economies and boost jobs and growth. The observance of Global Wind Day is to celebrate the perks of wind energy, and educate people about the power and endless potential that the wind energy possesses.

Renewable & clean source of energy

Low operating costs

Efficient use of landscape

Installed over **800** wind-monitoring stations all over country

Issued wind potential maps at **50m, 80m & 100m** above ground level in India.

Top five wind power farms operating in India

Muppandal Wind Farm: 1,500MW
Tamil Nadu

Brahmanvel Wind Farm: 528MW
Maharashtra

Jaisalmer Wind Park: 1,064MW
Rajasthan

Dhalgaon Wind Farm: 278MW
Maharashtra

Vankusawade Wind Park: 259MW
Maharashtra

Global Wind Day

15th June, 2021

Objectives of this day

- It aims to educate people about the power of wind energy harnesses.
- It spreads information about the benefits of wind energy, and how it is cost-efficient and competitive.
- Wind energy is considered to be one of the cleanest and most renewable sources of energy.
- It is also very cheaper, in some circumstances, when compared to its contemporaries.
- Wind energy helps in reducing CO₂ emissions, which eventually helps in cleaner air in the surroundings.
